

creative stamping

Thank you for joining me to celebrate the new September–December 2026 Catalogue.

Tucked inside your little gift is a packet of sunflower seeds, just for you. Pop them in the ground, give them some love, and watch them bloom! And just like these sunflowers, I hope you feel inspired and your creativity keeps on growing.

Did you know...

- 🌻 ...right now (September–January) is the best time to sow sunflowers in the Waikato?
- 🌻 ...this variety can grow up to 2 metres tall with blooms up to 20cm across – that's a dinner-plate-sized flower!
- 🌻 ...what looks like a single flower is hundreds of tiny flowers, packed together in the centre.
- 🌻 ...young sunflowers track the sun as they grow, then tend to settle facing east on maturity.

I'd love to see your blooms when they open – tag me on Facebook or Instagram @creativestamping so I can cheer you on.

When to sow?

Zone 1	Zone 2	Zone 3	Zone 4
Spring	Spring	Spring	Spring
Summer	Summer	Summer	Summer
Autumn	Autumn		

How to Sow:

Choose a sheltered, well drained site in full sun. Sow these seeds direct where to grow in a well prepared seedbed. Sow 2-3 seeds in groups 40cm apart and to a depth of 1cm.

Care for seedling:

Keep seedbed evenly moist during the germination period of 7-14 days. Apply **McGregor's FruitMax** 2 weeks after germination for healthier plants and maximum flowering. Protect your flower garden from snails and slugs with **McGregor's Snail and Slug bait** and from White Butterfly with **McGregor's Derris Dust**.

Hints & Tips:

Can grow up to 2 metres tall, so will need staking or protection from the wind.

The seed contained in this packet is packed in dry air and sealed in foil to protect it from moisture and sunlight (heat). If you need to store seed do so in a cool, dark location.
